VEHICLE TYPE: Vinyl acrylic
LIGHT REFLECTION: 90%
FLASH POINT: N / A
VISCOSITY: 95-100 KU
V.O.C.: Below 250 Gr/L

• SURFACE PREPARATIONS:

Make sure all surfaces are dry, smooth and free from dirt, grease, wax, and loose chalking paint. Fill cracks and nail holes with patching paste. Always clean off contamination between coats before applying subsequent coats. If surface to be coated is slick or shiny use sandpaper or liquid deglossing compound to remove shine. Wipe thoroughly to be sure surface is clean. **Concrete Block:** Fill with block fill. **Drywall:** Apply one coat of P.V.A. or alkyd primer sealer. **Wood:** Apply one coat of latex undercoater alkyd wood primer. **Previously Painted Surfaces:** If in sound condition and uniform porosity, no primer is

required. Remove dirt, grease, wax and any peeling or scaling paint. Clean surface contamination by washing with a powdered commercial cleaner. Rinse thoroughly and allow to dry. Dull gloss surface with fine sandpaper.

• APPLICATION:

Use brush, roller, or spray equipment. Avoid painting in fog, mist, rain, or if the temperature is below 50° F.

• THINNING:

Not required. If thinning is desirable due to weather conditions, a small amount of water may be used.

• CAUTION:

Observe ordinary precautions when using this product. Wash hands before eating or smoking. Avoid breathing vapors or spray mist and prolonged contact with skin. Use only with adequate ventilation. **DO NOT TAKE INTERNALLY, KEEP FROM FREEZING AND KEEP OUT OF REACH OF CHILDREN.**
